My biggest gripe is you cannot play others online without plugging in a controller. Kinda annoying since I am better on mouse... since, ya know, control. I wish they would change this.

That said, the game has great mechanics, is consistent, and fun to play. If you increase your "ego" (difficulty multiplier) the opponents get better and you can continue to challenge yourself. It is on a 0-99 scale so you can make it manageable to beat the cpu if you are having trouble. There are lots of different play styles to choose from for teams. The players themselves have attributes like "mojo" and "fitness" that will affect how they perform.

Overall, if you are looking for a sports game out there to play on pc, this is the best one.

-25 yr old. Have played: Madden, NBA 2k, Fifa, and lots of FPS and BR's. This is actually a fun and good game. Add me if you want to play.. I don't like Baseball and I don't like where it's gone these days. I did like it back in the 50s, 60s and 70s and this is where SMB2 takes me too, back to a time when the game was just plain fun and a blast to play. Then add to that I can play online and customize my teams, can you say Perfect Storm! They got it right, I just hope they do the same with Football (or Hockey).
